Hey y'all,

Sorry for the delay here. See attached for three raw files from election night, taken at 10:35, 11:08, and 11:51 PM. I'm also attaching a file called DeKalb change over time, which tracks changes in totals as the night went on. Several precincts reported initial election night results and then added more votes to them in subsequent updates in the gubernatorial - I have not looked downballot but this may have happened in other races as well (ie if they missed counting one machine initially entirely).

Precincts that definitely changed over the course of election night/since then were:

Kittredge Elem

Rockbridge Elem

Epworth

Glenwood 04

Glenwood 05

Let me know if there's anything else useful I can provide.

Thanks,

Jack DeLapp

Hi Marilyn,

The best person to ask would be Jack DeLapp, whom I've copied here and served as our Data Director on the campaign. Thank you so much for all you're doing to protect voting rights in Georgia.

My best,

Melody

Melody,
We have found some funky things on the machine tapes that changed between what was posted on the door and the 11/9 update.
Do you have results by precinct loaded early on in the election tabulation? Election night or 11/7?
If you can share a copy, that would be great.
Thanks.
Marilyn
